Mr. Jake Arnold
Omaha, Arkansas 72662

Dear Jake:

I received a phone call from Mr. Leland Tollett with Tyson's who said that they were waiting on the EPA to make a determination as to the safety of the site and were still making plans to locate there. Mr. Tollett suggested that I not contact the EPA for two or three weeks, to see if they will resolve the problem without any further prompting. Apparently, some pressure has been put on the EPA to make a decision. I also visited with Bob Barker who told me that MASS was planning a surface clean up of the site sometime in October to see if that would solve EPA's problem. At least I suppose that most folks know that Omaha is interested and willing to help and if you would like to for me to do anything further please advise.

Thank you.

Sincerely,

GRESHAM AND KIRKPATRICK
